Von "Spirit of Place" zu "Place"

Widersprüche und Dialektik der "Theory of the Local"

A: The Local is the Universal

Non A: Das Lokale ist Enge

B: The Multiplicity of Places is futile experience

NonB: Die Vielheit der Orte ist Weite

Um dem Lokalen die Enge zu nehmen, es universal zu machen, müssen Techniken, die A mit non B verbinden entwickelt werden.

Techniken, das Lokale zu universalisieren: Transzendieren, Entkulturieren, Naturalisieren, Objektivieren, Anonymisieren. Kräfte, die das Lokale binden, dem Universalisieren entgegenstehen:

Überzeichnen, Benennen, Fixieren, Subjektivieren, Sentimentalisieren.

Dieses fällt dem Ethozentrismus zu.

Die Kunst ist, diese bindenden Kräfte zu neutralisieren, ohne das Lokale aufzuheben.

Frühe Projektbeschreibung:

1 Spontane Volksmusik, Orte: Wirtshaus. Straße, Kärwa, Arbeitsplatz, Freundeskreis, Spielplatz.

2 Aufzeichnen der Lokalen Musik: Kinderlieder, Wirtshauslieder, Gespräche.

3 Aufgenommene Materialien: Lokalisieren, Transkribieren.

4 Auswerten:

a) rein materialbezogen nach Skalen, Taktweisen, Textinhalten, Melodiezügen, Tempi etc.

b) funktional, in welchem Zusammenhang die Musik gefunden wurde, Art des Entstehens aus dem Alltag, Beschreiben der Spontaneität, in der die Stücke entstanden. Reaktionen des Umkreises.

c) Beziehung zwischen Funktionalem & materialem Zusammenhang z. B. Improvisation als Ergebnis von Spontaneität

5 Entwickeln von Allgemeinem aus dem Beobachteten, Katalog von Musizierweisen, Modelle spontaner Volksmusik.

6 Kreatives Konstruieren von Musiziermodellen, die auf den Sammlungen aufbauen:

a) Destillieren zu Formen

b) Erweitern des Improvisierens:

"Ragaisierung" Aufheben der Statik?

7 Entwickeln einer Reihe von Stücken als Ergebnis der Erfahrungen, die nur insoweit festgelegt sind, daß sie als spontane Volksmusik gelten.

8 Einüben dieser Stücke mit Musikern, die aus dem Lokalen Bereich stammen. Übungen im Improvisieren. (C. Wolff's Technik)

D.H. Lawrence: The Spirit of Place

"The realization of the qualities of a place in relation to the life which occupies it; embracing everything involved, climate, geo-graphic position, relative size, history, other cultures, as well as the character of its sands, flowers, minerals and the condition of knowledge within its borders. It is the art of lifting these things into an ordered and utilized whole. . ." "It is shifting over from the old psyche to something new, a dis-placement. And displacements hurt."

"Every continent has its spirit of place. Every people is polarized in some particular polarity, which is home, the homeland. Different places on the face of the earth have different vital influence,

different vibration different chemical exhalation, different polarity with different stars: Call it what you like. But the spirit of the place is a great reality."

"Men are free when they belong to a living, organic, believing community, active in fulfillingsome unfulfilled, perhaps unrea-lized purpose. Not when they are erading to some wild west."

Das Projekt Lokale Musik hebt den vermeintlichen Gegensatz von Tradition und Fortschritt auf, weil es das in schriftlicher Form vorhandene traditionelle Material als Transnotation einer verlorengegangenen Improvisationskunst begreift und mit den Methoden der "cognitive musicology", die im schriftlich überlieferten Material liegenden Lebensgesetze dieser Improvisationskunst wiederbelebt.

"Habitat, Niche and environment. Habitat is defined as the place where the organism of the species lives - it's ,adress'. Niche refers to the role that the organism plays in a wider network of mutual dependencies.

('Place of an animal in the economy of nature' - Darwin)

Niche emphasizes the functional role of the organism (State-Space)

Environment is assumed to change constantly with organism. Individual organism changes in morphology, physiology, experience. Environmental factors change in diurnally, seasonally, climatically, biotically & geologically."

"An organism is no tabula rasa where an environment writes as it pleases. The organism converts energies into Stimuli out of the natural surroundings. An animal organizes the world within which it acts."

"Space" semantic description. Place = part of the world that something can be thought of a being a part of.

William Carlos Williams. The Importance of Place:

"Yet there is a palpable mode by which this ,beginning' is universally objectified, where it centers, not as a mystery, and that is place."

"The prelogical the 'beginnings'"

"Knowledge must be located outside the mind, objectified, it is place itself - on which all arguments fall. It's basis is to seek a place on which to rest the emotions."

"The embodiment of knowledge beginning: Nothing less is intended than a revolution in thought with writing as the full run, by means of which-and the accidental place, any place (. . .)-one like another, therefore where we happen to be, our locality as base. Before any of the arguments begin they must be placed, for from place, a place, begins everything- is in fact a place synchronously occupied by everything and at the same time space itself - nothing but.

Before science, philosophy, religion, ethics - before they can begin to function - is a religion unsusceptible to argument. It is not the past, whose sole property is place."

"Every individual, every place, every opportunity of thought is both favored and limited by its emplacement in time and place. All sorts of complicated conditions and circumstances of land, climate, blood, Surround every deed that is done."

Thus we are to work in our own 'locality': Not pigishly, not narrowly and the justice of this is that by such pluralism of effort in each several locality a ,reality' is kept; in plural - and so verified - by success in many places on different planes our efforts are confirmed."

A. North Whitehead. Science in the modern world:

"The unity of the perceptual field. Therefore must be a unity of bodily experience. . . My theory involves the entire abandonment of the notion that simply location is the primary way in which things are involved in space-time. In a certain sense, everything is everywhere as all times. For every other location. Thus every spatio-temporal standpoint mirrors the world."

H. Partch's "Corporeality" in: Genesis of a Music:

"The corporeal versus the abstract"

"Corporeal may be used since it is a music that is vital to a time and place, a here and now. Abstract, the spirits of all united into one and transported into the realm of unreality neither here or now, but transcending both."
