# Table of Contents

**1 Introduction......6**

**2 Fundamentals......8**

2.1 Aims......9

2.2 Sacrifice......12

2.3 Cut......15

2.4 Threatening to Cut......17

2.5 Connection......20

2.6 Removal......23

2.7 Capture......24

2.8 Giving Atari......27

2.9 Threatening to Give an Atari......29

2.10 Escaping From Atari......33

2.11 Preventing an Atari......35

**3 Environment......38**

3.1 Running......38

3.2 Connection to Another Group......41

**4 Eyespace......46**

4.1 Potential versus Final Eyespace......46

4.2 Eye......48

4.3 Simple Boundary Defects......50

4.4 Lake......53

4.5 Nakade......55

4.6 Eye Value......63

**5 Fighting about an Eyespace........................................................66**
5.1 Protecting the Boundary of a Lake............................................66
5.2 Threatening to Create a Lake.....................................................69
5.3 Attacking a Lake.........................................................................72
5.4 Creating a Nakade......................................................................75
5.5 Threatening to Create a Nakade.................................................78
5.6 Creating a Partition....................................................................81
5.7 Threatening to Create a Partition...............................................83
5.8 Preventing a Partition................................................................85
**6 Size of the Eyespace....................................................................88**
6.1 Expansion..................................................................................88
6.2 Reduction...................................................................................91
6.3 Threatening a Reduction............................................................93
6.4 Preventing a Reduction..............................................................96
6.5 Big Reduction.............................................................................99
6.6 Preventing a Big Reduction.......................................................101
6.7 Throw-in...................................................................................103
6.8 Threatening a Throw-in............................................................107
6.9 Preventing a Throw-in..............................................................110
6.10 Threatening to Make an Eye by Removing a Throw-in............112
**7 Liberty Shortage........................................................................116**
7.1 Snapback..................................................................................116
7.2 Threatening a Snapback............................................................119
7.3 Preventing a Snapback..............................................................121
7.4 Creating a One-sided Approach Block......................................124

7.5 Threatening to Create a One-sided Approach Block.................127
7.6 Preventing a One-sided Approach Block..................................130
7.7 Creating a Two-sided Approach Block......................................134
7.8 Threatening to Create a Two-sided Approach Block.................138
7.9 Preventing a Two-sided Approach Block..................................141
7.10 Creating an External Liberty Shortage......................................144
7.11 Threatening to Create an External Liberty Shortage.................147
7.12 Preventing an External Liberty Shortage..................................150
7.13 Creating an Internal Liberty Shortage.......................................154
7.14 Threatening to Create an Internal Liberty Shortage..................157
7.15 Preventing an Internal Liberty Shortage....................................160
**8 Double Purpose..........................................................................163**
8.1 Double and Multi-purpose Moves.............................................163
8.2 Double and Multiple Threat......................................................165
8.3 Equal Options............................................................................168
8.4 Different Names for the Same Purpose......................................171
**9 Basic Reading Principles.............................................................172**
9.1 Obvious Move............................................................................172
9.2 Obviously Inferior Moves.........................................................174
9.3 Interesting Moves......................................................................175
9.4 Simplification............................................................................179
**10 Mixed Problems.........................................................................183**
**11 What Have We Learnt?.............................................................192**
**12 Index.........................................................................................193**
